

## **Argo Community High School District 217 (IL) Partners with PowerSchool for an Online Student Registration Solution with Multilingual Functionality**

**Rancho Cordova, CA – February 24, 2015** – Argo Community High School District 217 in Illinois, will move from a paper-based system to an online solution for registering students. PowerSchool will provide this district with a customized registration solution that will streamline new and annual student registration through seamless, real-time, on-demand data transfer with their PowerSchool student information system.

“We would previously have 25 stations set up in our school’s cafeteria for registration. Families would come in and stop at each station for different paperwork. PowerSchool Registration is going to eliminate that step in the process and provide our families with a more convenient approach for registering students,” said Nick Simov, Director of Technology at Argo.

Families who have more than one child within the district can ‘snap’ data from one student to another. The use of SmartForm™ technology, an intuitive tool built into the solution, will collect relevant data based on previously entered information or choices (grade, activities, medical history, etc.).

The data submitted by families are reviewed, polished, and formatted to meet Argo Community High School District’s policies and then delivered into the district’s PowerSchool student information system. This will improve the accuracy of data collected on an annual basis. In addition, PowerSchool Registration’s Language Localization will meet the need of this diverse population by providing multilingual forms to families.

“We are going to provide our families with a much smoother registration process and our administrative staff with increased efficiency. What would take our families several hours to register their child/children for school will now take minutes to complete with PowerSchool Registration,” said Simov.

### **About PowerSchool Group LLC**

PowerSchool is the #1 leading education technology platform for K-12, serving more than 40 million users, 15 million students, and 70 countries around the world. We provide best-in-class, secure, and compliant online solutions, including student information systems, registration and school choice, assessment and analytics, and special education management.
