

# Naviance by PowerSchool

Help students prepare for future success with greater operational security, accuracy, and simplicity with PowerSchool SIS Integration

Naviance is the leading college, career, and life readiness (CCLR) platform, equipping over 10 million students in 40% of U.S. high schools with the skills they need to reach their future goals. With data security best practices implemented throughout the platform, real experience with scalability, and native integration with PowerSchool SIS, you can launch Naviance district-wide with confidence.

## Simple, Accurate Data Management

By integrating Naviance with your SIS, student data flows seamlessly from the SIS to Naviance, which reduces duplicate data, ensures accuracy, and helps paint a full picture of the student.

## Keep Student Information Secure

Encrypting student information in transit and at rest, Naviance uses modern encryption technology like AES256-GCM, strict user management permissions, and the security prowess of AWS to keep unnecessary eyes off sensitive student data.

## Reduce Onboarding Time and Cost

Technology teams can quickly implement Naviance by immediately pulling in data from PowerSchool SIS, while limiting the amount of custom coding required to get Naviance up and running.

## Drive CCLR Outcomes

The faster districts and school get up and running with Naviance, the faster they can start driving real CCLR outcomes. When all stakeholders are looking at the same data, no matter their system of preference, it's easier to make decisions that make a difference.

“I'm excited about the Naviance and PowerSchool SIS data integration -- marrying the college, career, and life readiness data with the SIS data will paint a fuller picture of the student”

**ANNA HARDING**

Data Administrator, Anne Arundel County Public Schools, MD

## Naviance with PowerSchool SIS integration makes everything—implementing, launching, and maintaining Naviance—easier.

### One-Time Data Entry

End the frustration of having redundant and out-of-sync data across multiple systems. By integrating Naviance with your SIS, student data flows seamlessly from your SIS into Naviance, reducing duplicate data and getting your teams on the same page.

### 4, 8 and 24-Hour Sync Frequencies

Some data fields need more maintenance than others. With Naviance's integration with PowerSchool SIS, your student data can be synced at 4, 8 or 24-hour intervals, depending on how often you need.

### AppSwitcher

Easily switch between your PowerSchool solutions within a single experience. District leaders and college and career readiness educators can easily transition between PowerSchool SIS and Naviance to quickly complete priority tasks like entering ILP information, viewing student attendance, or reviewing a Student Readiness Report.

### PowerSchool SSO, SAML and Clever

Simplify user management, while making it easy for users to get logged in. With support for Clever, SAML, ClassLink, Google EDU, and PowerSchool SSO, no matter the configuration, Naviance can get users signed in.

### AWS Hosting

Hosting Naviance on AWS puts security in the hands of experts trusted by top financial institutions, hospitals, and other data-sensitive industries required to meet stringent security standards, such as GDPR and SOC.

# 24 Hours

to load all student records into Naviance with PowerSchool SIS integration. What used to take weeks is now completed in hours.
