

Student Information Systems from PowerSchool

POWERING ALL YOUR K-12 EDUCATIONAL TECHNOLOGY

Power your school operations to success with **innovative, easy-to-use technology** at the center of your K-12 educational ecosystem.

Experience a **scalable, end-to-end student information system (SIS)** from the trusted market leader. Available in 63 U.S. states and Canadian territories and provinces, **PowerSchool is here to help you choose the right SIS for your school or district.** PowerSchool's portfolio of SISs include:

PowerSchool SIS

Power your school operations to success with **innovative, easy-to-use technology** at the center of your K-12 educational ecosystem.

PowerSchool eSchoolPlus SIS

Make it easier to manage the **entire flow** of K-12 district information.

PowerSchool iNow SIS

Combines the capabilities of an **SIS, LMS, app store, and learning engine** into one comprehensive student platform.

PowerSchool Trillium SIS

Provides direct, real-time access to **enterprise-wide student information** at the board level for all students, in all schools.

Works for Your District and School Board

Tailor your SIS to fit your district and board's unique needs with **configurable, adaptable software**. Choose from hundreds of pre-built and ready to use options in the online support portal **from districts just like yours**.

Delivers Peace of Mind

A dedicated security team and best-in-class cloud hosting from **Microsoft Azure** that ensures your data is safe, secure, and always accessible. Our SISs adhere to the highest security standards, holding an ISO 27001 certification.

Promotes Family Engagement

Engage families and help teachers **communicate to the right people in less time**. Provide students and their families the ability to check assignments, attendance, grades, and school bulletins—all from their phone, tablet, or computer.

Simplifies Compliance Reporting

Easily manage **FERPA, HIPAA, COPPA compliance** and other laws with smooth and accurate state and provincial reporting that ensures your districts and boards receive maximum funding.

Provides Real-Time Student Insights

Gain real-time insight into student performance, behavioral trends, and key demographic information to **make informed decisions** that lead to student success.

As the trusted market leader, PowerSchool broke the ground with the first-ever K-12 web-based SIS and is featured as the top customer-rated SIS on G2 Crowd's system. Simple time-saving tools for compliance reporting, classroom management, and family communication prepare you for the road ahead, no matter what it brings.

Key features and functionality* of our SISs include:

Reporting

Easily run standard reports or build custom reports to reveal trends in student performance to make informed decisions that improve student outcomes. Districts and boards save time and improve accuracy with efficient, intuitive, and automated importing and exporting processes.

Mobile App

Boost student accountability and parent engagement with the industry's highest-rated mobile app. With the option to get real-time push notifications, families stay on top of student progress. Available on any Android or iOS device.

Enrollment & Registration

All student enrollment data automatically populates in the SIS to provide staff with family data, immunizations, addresses, and more. Export relevant information to other departments, such as transport and athletics.

School & District Administration

Create district-defined attendance codes, discipline reports, custom report cards, and transcripts configured for your district's needs.

Tuition Billing

Paying tuition or meal fees is easy and convenient for parents with the option to make payments online in the Parent Portal.

Student & Parent Portal

Convenient parent and student portals offer families easy access to student performance, including grades and attendance. Parents can pay fees, email teachers, access school information, and help their student stay on top of assignments and attendance.

Grading

Reduce teacher and administrator time with faster grading, attendance, and scheduling. Quick-fill technology makes entering scores lightning fast while visual reports show teachers how students are doing on assignments and standards mastery.

Scheduling

Flexible scheduling options support schools with complex scheduling needs. Our walk-in and master schedule builders help ensure student course requests are fulfilled and classes are balanced.

Health

Provide teachers, nurses, and parents with access to important health information, while staying FERPA and HIPAA compliant.

Partner Network

With open-standards-based software, our SISs offer certified integrations with over 100 Independent Software Vendors (ISVs) and partners for widescale compatibility with all your ed-tech products

* Features and functionality availability may vary by SIS.
