

# TOO MANY TECH TOOLS

Disparate and siloed school technology systems negatively affect school administrators, teachers, parents and students. When systems are disparate, or even loosely coupled, school districts risk time and expense. However, the greatest risk is the loss of critical insights regarding the potential of their students.

## SCHOOL ADMINISTRATION

30% of all help desk requests are for password resets<sup>1</sup>

In education, that means 30% of 3.5 million teachers and 50 million students times a plethora of platforms. When the time spent is considered for every student and teacher, the potential productivity loss is staggering.<sup>2</sup>

## CLASSROOM

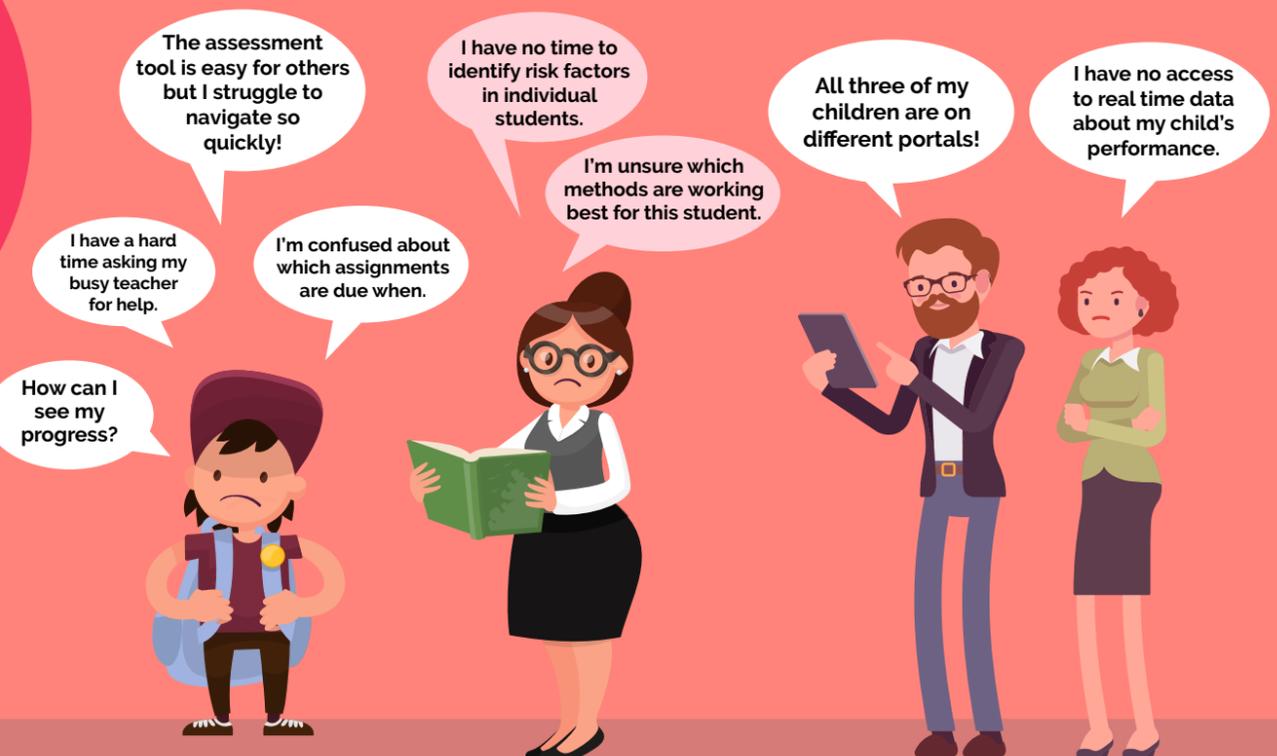

On average, teachers work 10 hours and 40 minutes a day (53 hours per work week), yet only 25% of that time is spent teaching in the classroom.<sup>3</sup>

## INDIVIDUAL STUDENT GROWTH

An estimated 5 to 7.5 million students miss nearly an entire month or more of school, which puts them at significant risk of falling behind academically and failing to graduate from high school.<sup>4</sup>

Want to see how one unified solution can eliminate technology silos and help teachers manage the entire instructional process with ONE seamless app?

Take a glimpse into the Unified Classroom
