

Top 5 Benefits of Adding Unified Classroom[®] to Your PowerSchool SIS

Adding Unified Classroom to your PowerSchool SIS can help make a teacher's day more efficient and productive by providing them with a single solution to understand and support every student.

1 Give Teachers More Time

Real-time attendance and standards grade passback allow teachers **more time** to focus on improving student performance and less on manual data entry.

IN PRACTICE:

"We greatly benefit from all of the integration being a nightly, automated process that does not require any additional action on our part...it's excellent for ensuring that teacher rosters are up to date and students can access the course materials."

Tom Hamill | Coordinator of Research and Student Information Systems, Worcester County Public Schools, MD

2 See the Whole Child

With real-time student alerts and special programs documentation all in one place, teachers can **quickly make informed decisions** to build and deliver personalized instruction.

IN PRACTICE:

"[Our edtech suite] allows us to get that whole-child view and true unification across systems. Working to unify data allows us to pinpoint specific things in the [student's] learning path."

D. Patches Hill | Supervisor of Technology, Seaford School District, DE

3 Accelerate Learning Gains

Features like grading groups and common assessments **help teachers meet every student where they are** and provide the right resources to get them where they need to be.

IN PRACTICE:

"We continue to be impressed with how well the system keeps pace with the increasingly sophisticated ways we use data to drive student achievement."

Rich Boettner | Chief Technology Officer, Hillard City Schools, OH

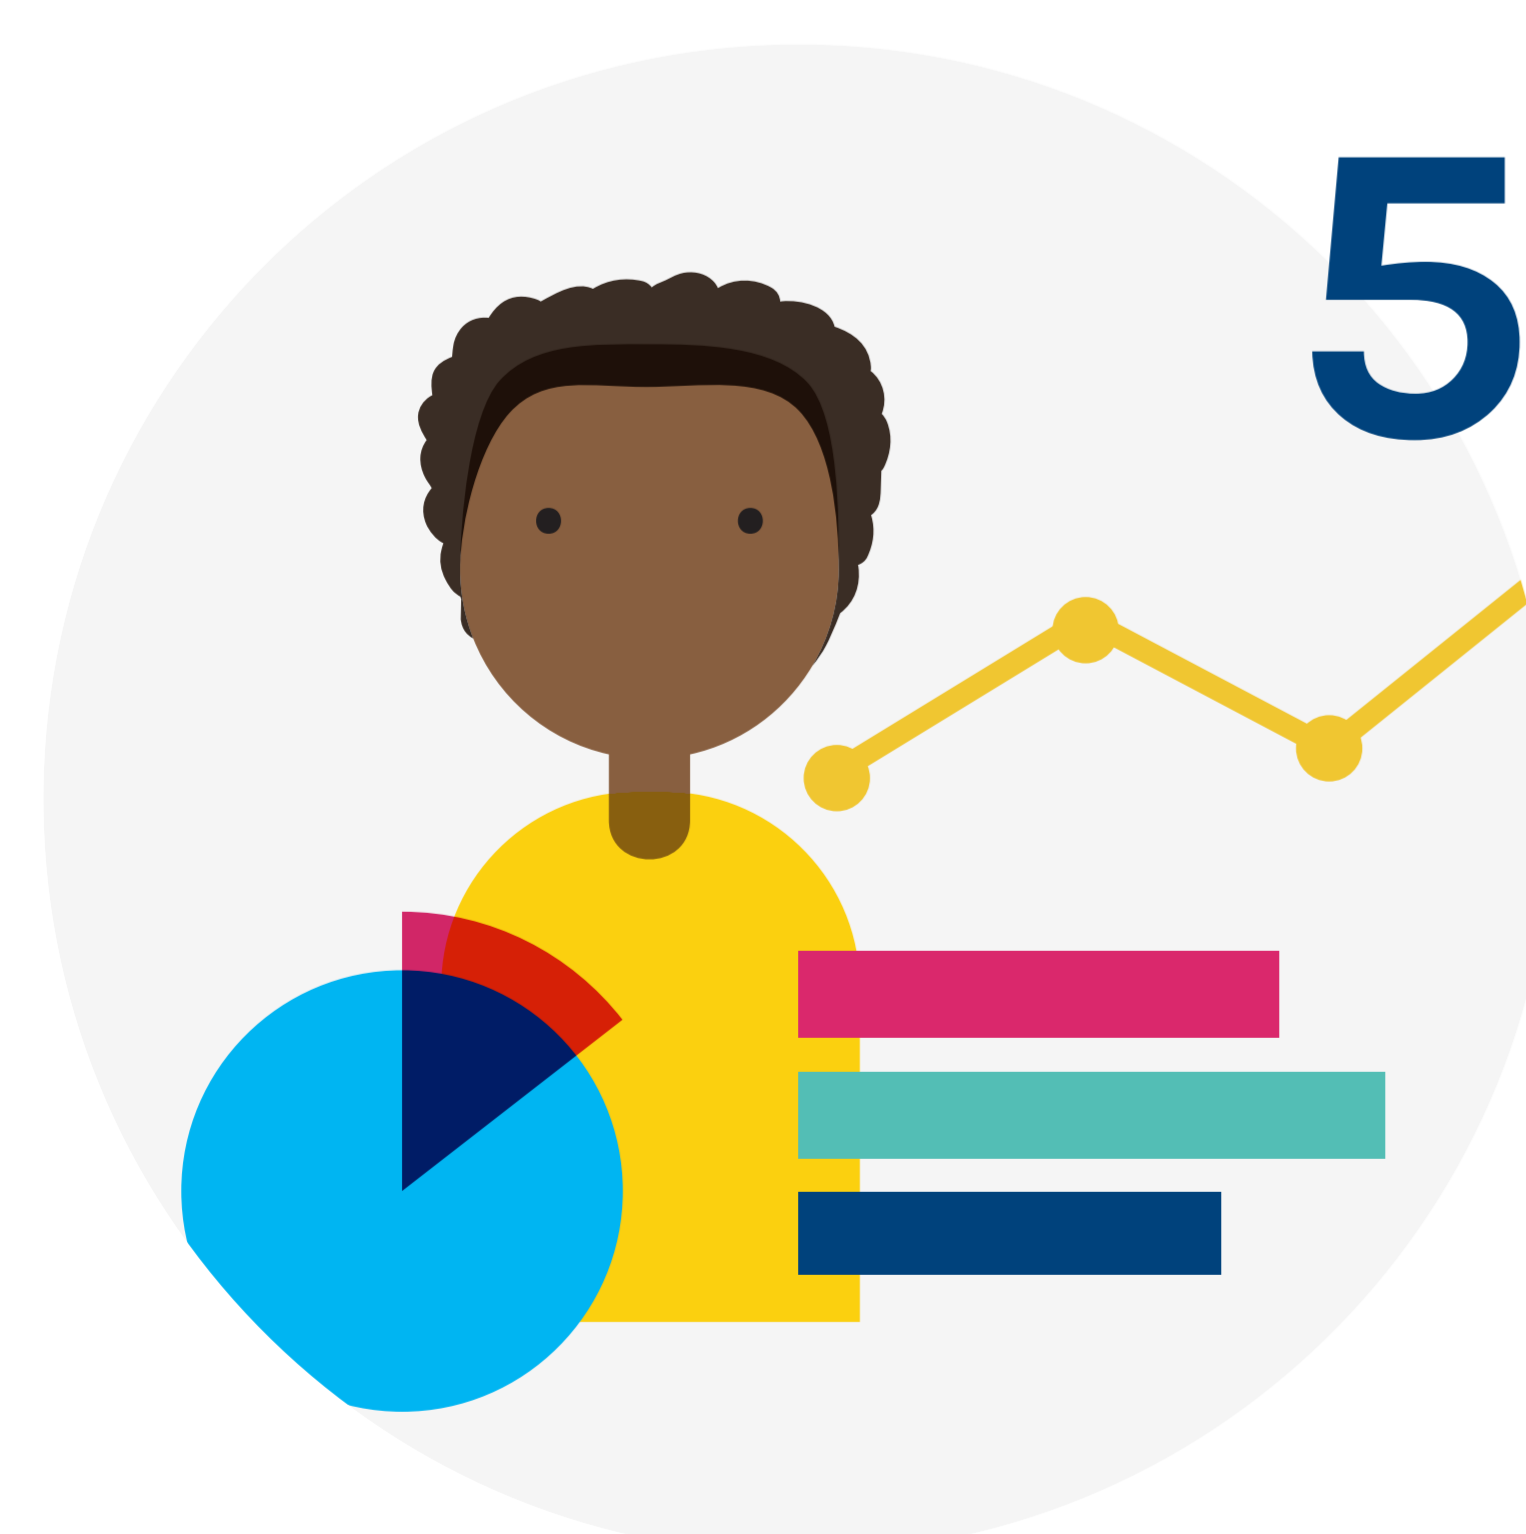

4 Personalize Instruction

When teachers have a central place to view and record student performance data, they can **adjust instruction** to fit areas of need and align with standards and learning objectives.

IN PRACTICE:

"[Our edtech] integrations give our teachers and staff a one-stop-shop for all the programs they need to deliver data-informed, whole-child instruction."

Reinette Chenard | Data Manager/System Administrator, RSU 10, ME

5 Simplify Data Management

All stakeholders can quickly and accurately **draw actionable insights** with a relevant, customized view into student data.

IN PRACTICE:

"The [Unified Classroom and PowerSchool SIS integrations] also help with transparency with intervention and benchmark data and early warning indicators."

Morri Pace | Coordinator of Innovative Learning, Powhatan County School District, VA
