

36 Benefits of Taking Schoology Learning District-Wide

A Crowdsourced Anthology of Strategies from Real Education Professionals

Introduction

As educators, you know the benefits of students taking ownership of their learning. But many teachers are unaware of how to embark on this journey while still maintaining order and holding onto the reins.

For many schools and districts, the adoption of a district-wide learning management system (LMS) has been the ideal solution. Not only do students have access to personalized and differentiated learning, a repository for their own work and resources, and unlimited access to curriculum and content from anywhere, but teachers

get the added benefits of more flexibility in the blended learning environment, professional learning resources, and much more.

This eBook is a compilation of ideas directly from the Schoology Learning community—diverse educators from across the country who are currently reaping the benefits of using an LMS across the district. What they’ve discovered along the way is that these benefits are just as plentiful for students as they are for the teachers who guide them.

As you read through the pages in this book, consider how students and teachers in your district can grow and learn through the implementation of a district-wide LMS.

1

STUDENT BENEFITS

Equity & Ownership

“The greatest benefit in using Schoology has been the amount of ownership students are now able to take over their own learning.

They can check their grades, access assignments from anywhere, and stay on top of their work regardless of where they are. Additionally, the Groups function allows for more seamless communication with families about after-school sports or clubs, and much of our district PD is set up as a course for teachers to stay organized/in the loop. Our district has a sordid past when it comes to equity, and Schoology is helping level the playing field.”

2

STAFF BENEFITS

No More Stacks!

“Teachers are simultaneously the most and the least organized people.

With a dozen PDs on our plates and multiple preps, it can be really difficult to feel like the planning time we’re given has been productive or efficient. My favorite ‘teacher’ aspect of Schoology is the reminders box on my dashboard. My grading policy allows for students to resubmit work, so I am always able to regrade (quickly) without having to sort through a stack of papers. It is also a nice thing to show students when they ask, ‘Why didn’t you grade this yet?’ and I can reply with, ‘Please look at how many submitted assignments I have to grade before yours.’”

ALISSA WARREN

Teacher & Team Specialist, Denver Public School, CO

Years using Schoology: 4

District Enrollment: 90,000

Hardware Structure: 1:1, students can take home

3

STUDENT BENEFITS

Breaking the Fourth Wall

“The ability to differentiate instruction and provide personalized learning for all students is the best benefit I can name with using Schoology in the classroom.”

Since Schoology can be used in a collaborative setting and also used in a way that replicates many of the assignments with small adjustments here and there, it becomes less than cumbersome to differentiate an assignment or provide different learning activities for students with different needs. Well this may seem traditional for a learning management system, Schoology’s versatility provides an opportunity for students to learn in an engaging environment while benefiting from best practices in online and blended personalized instruction.”

4

STAFF BENEFITS

Making Magic Through Collaboration

“Schoology is not a difficult platform to learn.”

While there may be some learning curves for staff who are not as familiar with technology, I have found that overall my colleagues find Schoology to be unencumbered and streamlined. As a professional development platform, I have found that it builds camaraderie among educators and provides for a meaningful set of learning activities and assessments that can be embedded in the workplace to provide on-demand as well as structured learning in and out of the classroom. However, what I find most beneficial in using Schoology as a professional development platform is the ability to personalize learning for teachers with different needs, interests, and levels of experience.”

SEAN COFFRON

Instructional Technology Training Specialist
Manassas City Public School, VA

Years using Schoology: 6

District Enrollment: 9,000

Hardware Structure: 1:1, students can take home

5

STUDENT BENEFITS

One-Stop-Shop for Education

“The ability for students to have all of their work and resources in a single place.

Even if teachers use third-party apps they can be integrated into Schoology. Because school work, materials, and resources are in one place, it is easy to find, organize, and complete schoolwork and assignments. Communication with teachers is much easier than through email, and groups can be used for everything from pushing out announcements for the entire school to sharing information for clubs or sports. While individual teachers may have different styles and use Schoology differently, the main tools such as assignments, messages, updates, and calendar are consistent throughout the Schoology platform. This consistency saves time and frustration when it comes to schoolwork or communicating with teachers. On top of all of that, materials are now made available to students 24/7.”

6

STAFF BENEFITS

A Suite of Learning Options

“For teachers, many of the advantages are the same as those for students.

All of the learning materials, assignments, assessments, and apps that you want to use are easily housed in Schoology for students to access. Course materials can be stored in resources to add to courses or to share with teachers who teach the same subjects or grade levels. Communication with students is easy using messages to individuals or through updates for courses or groups. Assignments, Test/Quiz, Assessments, and Discussions are a suite of tools that allow teachers to assess student learning and measure growth as well. Standards can be tagged to assignments, questions, or used as criteria in rubrics. Teachers use the course Mastery tool to see when standards were assessed and if students have mastered them or need more training and practice. All of these tools (and more) in one place? That’s an amazing resource.”

PHILIP PULLEY

Teacher, Fieldcrest CUSD 6, IL

Years using Schoology: 5

District Enrollment: 1,100

Hardware Structure: 1:1, students can take home 7-12, 1:1 5-6

7

STUDENT BENEFITS

Ownership of Learning

“I have found that the biggest benefit for students has been the enhancement of learning that can happen both in and outside of the classroom.

While it's been incredibly beneficial to have access to Schoology and its tools in the classroom—discussions! assessments! assignments!—the best part about Schoology is the way in which my students can interact with class materials outside of school and learning hours. Asynchronous discussions, assignment submissions, and even assessment retakes can be undertaken on the students' time, even if it doesn't align with the 48 minutes per day that I normally see them. This access allows my students to have some ownership of their learning in a world that does not offer them ownership of many things.”

DENISE SHOVLIN

English Teacher, Tech Innovator
Downingtown West HS, PA

Years using Schoology: 5

District Enrollment: 1,100

Hardware Structure: 1:1, students can take home 7-12, 1:1 5-6

8

STAFF BENEFITS

Experimentation and Archiving

“Access to Schoology has allowed the staff in my district to engage with learning materials in a way I hadn't seen prior to implementation of Schoology as our LMS.

Teachers are becoming more innovative with the ways in which they present information to students, and they feel comfortable experimenting with the tools and integrations available to them through Schoology. Even more important, perhaps, is the way in which Schoology allows teachers to save things to resources and/or archive courses. Successful lessons, activities, assignments, and assessments are all available and ready to go for the next class period, school year, or colleague.”

9

STUDENT BENEFITS

There Can Be Only One

“Switching to Schoology provided our students with ONE location to do everything.”

Before Schoology we had students turning in homework 6 different ways. It was pretty much confusion and chaos! Students kept getting confused and turned in homework in one LMS, when it was supposed to be placed in a different LMS. It was also challenging for me as well. I was helping support 6 different ‘free’ LMS’s to over 100 teachers. It is imperative when going 1:1 that everyone is on the same page and that you decide on only ONE LMS. When given only one LMS, students can catch on quickly and will be relieved in knowing exactly where to find ALL course materials. Thanks to Schoology, our students can concentrate on their courses and worry less about mistakenly turning in assignments to the incorrect location.”

10

STAFF BENEFITS

Consistency and Direction are Key

“The biggest benefit for our teachers when we purchased Schoology was that they were finally given a direction.”

During the first couple of years of our 1:1 initiative, our teachers were trained in several LMS’s. No one was on the same page. Teachers were constantly struggling on which LMS was best for them. I believe they were given too many choices. They were also struggling with students not being able to keep up with ALL the different ways to turn in assignments. Many of our teachers became frustrated with this confusion and went back to paper and pen. Once we introduced a district-wide adoption of Schoology, everything changed. Having Schoology gave them the confidence that THIS is what they expected to use as well as knowing that ALL teachers would be using the same platform. It has brought consistency to our PD, expectations, and more.”

JEREMY MAHONEY

Director of Instructional Technology
Springfield Platteview Community Schools, NE

Years using Schoology: 6

District Enrollment: 1,000

Hardware Structure: 1:1, students can take home

11

STUDENT BENEFITS

One-Stop Shopping

“Students have a ‘one-stop-shop’ for all their materials.

They can view their grades in real-time and then ask follow-up questions about them. They can see what their upcoming assignments are. They can take tests online and get instant feedback. They can download materials such as handouts, class outlines, and syllabi. They can participate in online discussions, both in class and after school hours. They can view announcements from the administration and their teachers. They can see assignments in a calendar view to help them with planning. And in some cases they are taking courses online through Schoology, with the student completion rules. This helps develop a habit of self-directed study. But the key is that all of these things are available to them in Schoology, without having to visit a multitude of websites.”

12

STAFF BENEFITS

Everything in One Place

“The teachers also have a one-stop-shop.

Teachers in all grade levels—kindergarten through high school—use the gradebook as their official record of grades. They also post announcements for their classes, and in the elementary and middle school grades post a daily summary of the day’s activities for parents to see. In middle school and high school, where students have access to their own computers (BYOD), teachers also administer online tests and quizzes and distribute class handouts. The online tests have been a real time-saver for the teachers, since it drastically cuts down on the time needed for grading. And they are able to access our in-house professional development courses. But the key is that teachers can do all this in Schoology, and not have to set up a multitude of websites.”

ROD KIRBY

Academic Dean, Cherokee Christian School, GA

Years using Schoology: 7

District Enrollment: 380

Hardware Structure: BYOD

13

STUDENT BENEFITS

Learning is Personalized and Flexible

“Learning is personalized and flexible.”

We have very diverse student needs and Schoology allows teachers to meet students where they are at. We use quizzes and assessments to measure student needs and then we can individually assign lessons to best meet those needs. Schoology gives teachers access to immense amounts of data so our teaching decisions are based on student feedback. Also, Schoology allows curriculum to be flexible; I teach American Government and I want students to have access to the most current information, which changes on a daily basis. I am able to partner with students and engage in ongoing civic education.”

14

STAFF BENEFITS

Facilitating Data-Driven Decisions

“Schoology allows teachers in our district to partner in ways we have not before.”

We are always looking for ways to boost student achievement (and engagement), and Schoology gives us a new tool to do this. We have a district goal to use common assignments and assessments. We meet each week to plan those assessments and go over data. Schoology gives us access to specific data so we can compare teaching strategies and student achievement. We can compare and monitor student growth and share strategies and best practices. Also, Schoology Resources gives us a tool to share the work that we do across teachers and schools.”

COLLEEN COLEMAN

Social Studies Teacher, Burnsville High School, MN

Years using Schoology: 6

District Enrollment: 9,000

Hardware Structure: 1:1, students can take them home

15

STUDENT BENEFITS

To Assessments and Beyond

“Students have benefited from the use of Schoology through interactive lesson mastery components via assessments.

Students are able to chart their own growth based upon standard objectives and can chart their areas of continued growth. Assessments have provided students the option of interactive quizzes that combine real-time feedback and the potential for connection of resources tied to the student areas of confusion. Students have the ability to go back and review missed items and also have access to links for their continued study at home, even on their cell phones or available devices at home. Assessments can assess much more than a simple multiple-choice option. Students can appreciate an interactive formative approach that meets their needs and extends learning and deepens understanding.”

16

STAFF BENEFITS

Cohesive and Collaborative Campuses

“The biggest benefit for staff has been leveraging Schoology as a hub for communication and collaboration.

Often times, there has been a siloing practice of teachers and departments working on initiatives without the left hand knowing what the right hand is doing. Schoology has provided a means for campuses to work cohesively to create one concise message and mode of operation where all parties function on the same agenda. The collaborative workflow allows for master documents/assessments/lessons/activities to be created and shared to provide a means of measurement that is uniformed. Personnel and staff can function seamlessly and interactively in one space and place to enact a vision that all stakeholders can see tangibly.”

ERIC LEVELS

Coordinator of Online Programs
Aldine Independent School District, TX

Years using Schoology: 7

District Enrollment: 65,000

Hardware Structure: Shared carts of devices

17

STUDENT BENEFITS

Common Digital Workflow for All

“In a 1:1 classroom, Schoology has improved our digital workflow for our students.

I feel like this is one of the biggest benefits for our students to receive their materials for class, and it helps them stay organized in their classes. Students no longer need to learn more than one platform for turning in or receiving work from their teachers. We have a common language that is being used throughout our classrooms, which makes it a lot easier for students to know how to use Schoology in every class they are in. There are no longer excuses for not getting assignments because they are absent. They also can't use the excuse of their assignments getting lost or misplaced because our students have access to everything 24/7. Love Schoology for taking away the excuses! ”

18

STAFF BENEFITS

Schoology Learning = Flexibility

“Schoology allows teachers to have more flexibility in their classroom.

Teachers are able to have different materials ready to go if they need them. Schoology allows us to easily change due dates or publish and unpublish our materials as we need them. Using Schoology as our digital workflow can also allow for last-minute changes. If you have a PDF, you can make it happen! No more running to the copy machine at the last second to try to get those last-minute copies of something! A few clicks of a button and you are good to go! Schoology also allows for the flexibility of allowing students to have personalized learning in their class. Teachers can easily assign materials to different individuals or grading groups. Love that Schoology is available for me to make things easier for all! ”

NICOLE BURNS

Teacher, Bellevue East High School, NE

Years using Schoology: 4.5

District Enrollment: 10,000

Hardware Structure: 1:1, students can take home

19

STUDENT BENEFITS

All Students Are Engaged

“Having Schoology as our LMS is the primary tool that allows our 1:1 initiative to be successful.

It benefits the entire district K-12. With Schoology, our devices are used to engage our students. It helps teachers differentiate and create more personalized learning in every grade. This platform has made it easier for our teachers to integrate technology in meaningful ways. I am afraid without it, our devices might have been used for center time and games. With Schoology, our teachers can reach and engage all learners. With the use of it, our academic achievements have increased as well.”

20

STAFF BENEFITS

A Game-Changer for Staff PD

“Schoology has helped our staff in so many ways.

Our teachers have learned that when they put in the time on the front end, it saves them in so many ways on the back end. It also makes personalized and differentiated learning so much easier. Teachers tell me time and time again, how much more time they can actually spend with their students now using Schoology. From a PD perspective, we are able to offer so much more. We still have face-to-face trainings, but everything from mandatory to optional PD is loaded into Schoology. I use badges and color code them to track what teachers have completed. We even rolled out a gamified PD course that has been a big success.”

HOPE ELLIOT

Instructional Technology Coach
Lowndes County School District, MS

Years using Schoology: 6

District Enrollment: 5,000

Hardware Structure: 1:1 K-5 stay at school and 6-12 take home

21

STUDENT BENEFITS

Feedback for All

“Schoolology provides so many benefits to my students.

I love how Schoolology allows me to provide a multitude of applications to enhance learning for the different types of learners that are in my classroom. As one of the best planned and integrated systems, Schoolology makes it easy to accommodate the lower-level and the higher-level learners at the same time, and sometimes in the same classroom in the same time period.

The biggest benefit of using Schoolology with my students has been the ability to provide feedback on assignments to my students so that they can evaluate how well they did and improve not only their comprehension of the content, but also improve grades. Feedback allows my students to look at history from a different point of view or consider an event or issue differently.”

22

STAFF BENEFITS

Collaboration and Creation

“There are two major benefits for staff, in my perspective.

The first is the ability to collaborate. Not only with the teachers on my own team, but with teachers in other schools and other content areas. I can share my resources with another teacher easily and quickly, and we can work together to provide the same student consistent, accurate, and appropriate learning when that student comes to my campus.

The other benefit is a personal one for me. Schoolology allows me to organize my resources and save everything I need to do in Schoolology in a consistent and easy-to-manage-and-locate way. This has saved me time and energy in locating things that I need for my classes. Creating rubrics, question banks, files of images, political cartoons, etc., keeps me organized. It makes the inclusion of these items into assignments, assessments, etc., so much easier and faster than ever before.”

LESLIE NASH

Teacher/Social Studies Department Chair
Alief Learning Center, TX

Years using Schoolology: 6-7

District Enrollment: 45,800

Hardware Structure: Shared carts of devices

23

STUDENT BENEFITS

One-Stop-Shop for All Things Curricular

“Students have the ability to access assignments/announcements/etc. from ONE platform.

Before Schoology, we had teachers using all different types of platforms, and it got confusing for not only students, but parents as well. With students having multiple teachers in middle school, it was very hard to keep track of where each teacher put their resources for kids. Part of the reason for having an LMS for the entire district was to give everyone ONE platform to work within. All of our PD resources and district resources are housed within Schoology as well, so teachers are becoming very familiar with the LMS.”

24

STAFF BENEFITS

Sharing is a Cinch

“One of the biggest benefits of having an entire staff using Schoology is the ease of sharing and accessing materials.

I no longer have to ask someone to share a resource with me through a Google Doc. I can access all of my district’s curriculum through a few clicks within Schoology. There is a lot more collaboration happening between teachers and even between departments now as well. Since it is so easy to create a collection, we have teachers sharing entire courses with other teachers. The collaboration from building to building is absolutely seamless. We have started to create assessments in Schoology and have started to share those with everyone in the department as well, so our resource list keeps growing from year to year. It is very fast and easy to access a wealth of information.”

ELIZABETH LAMBERT

Instructional Coach, Bellevue Public Schools, NE

Years using Schoology: 4

District Enrollment: 10,000

Hardware Structure: Shared carts of devices

25

STUDENT BENEFITS

Real Workflow & Feedback

“I would say there are two things that I have noticed that have benefited our students.

First, the students have switched from paper/pencil planners to a digital platform for keeping track of their assignments. While our transition has not been without its rough spots, I believe that this will help the students transition nicely into the world of work. The second benefit I have noticed is the ability to help students on their path to mastery correctly and quickly. My building has spent a lot of time developing quick methods for formative feedback. Using Schoology’s test/quiz feature, both the students and staff are able to quickly analyze the results, provide feedback, and differentiate additional measures based on the needs of the students.”

26

STAFF BENEFITS

New World Workflow, Collaboration, & Resources

“I have noticed three distinct benefits.

First, staff has quick access to student results on assessments. This provides teachers with the ability to quickly re-teach concepts in which students were not able to demonstrate proficiency. Second, staff are more easily able to collaborate on student work and have the conversations necessary to improve student achievement. Schoology provides opportunities for staff members to save and share their work with colleagues. Finally, staff members are able to curate resources from Schoology’s vast network of users. By joining and working in Schoology groups, staff members are able to share what works or does not work in their classroom, as well as discover other strategies to bring back to their classroom.”

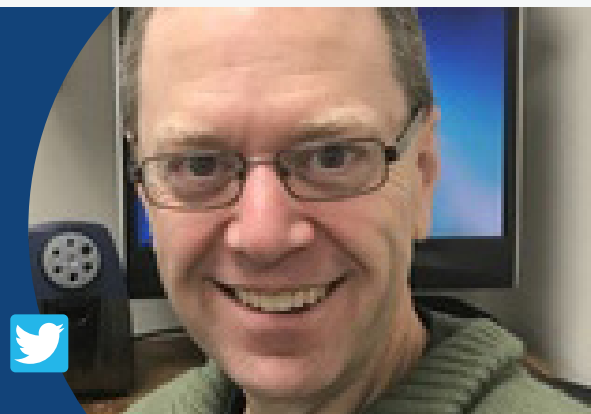

BRIAN BRUGGEMAN

Band Director, Monroe Middle School, WI

Years using Schoology: 8

District Enrollment: 1,200

Hardware Structure: 1:1, students can take them home

27

STUDENT BENEFITS

Learning: On Demand!

“ Schoology has allowed learning to become transparent for students and families.

Because the material is now online, not only can students see the course content posted on their computer, tablet, or phone, but they can also access the material they need in an organized fashion. Material organized by standard, content, unit, date, or type of assignment gives students some choice in how they want to search for and complete their work. Gone are the days of lost homework papers or not knowing what a student missed when they went to an appointment. This transparency has helped kids take ownership of their learning. ”

28

STAFF BENEFITS

Teaching: Untethered

“ The collaborative nature of Schoology has allowed teachers to more easily share resources, as well as communicate with students, parents, and co-workers.

Storing material in personal or group resources gives teachers the ability to organize and collaborate using materials that best fit the needs of their students year after year. The 24/7-access nature of Schoology gives teachers the ability to assign, assess, and provide feedback without being tethered to a stack of papers, a desk, or a clock. Basically, teachers can work on their course material when it is most convenient for them. Also, communication has increased with the use of private messaging, course updates, and parent access codes. Removing barriers has allowed teachers to reach families and make resources available more than ever. ”

LANE HALTERMAN

Edtech Coach, Westerville City Schools, OH

Years using Schoology: 8

District Enrollment: 15,000

Hardware Structure: Shared carts of devices

29

STUDENT BENEFITS

“If it’s not in Schoology, is it important?”

“The biggest benefit for students has been the calendar.

One of our first ‘requirements’ for teachers was to post classroom events, assignments, and assessments at least a week in advance. Our school groups, from Student Council to Drama, use Schoology Groups to communicate event schedules. Even our middle school and high school athletic teams all have Groups with schedules posted. As an added bonus, some use Media Albums to share event photos, which give students additional reasons to visit the groups and stay informed. Students learn a valuable life skill early on—using a calendar appropriately—because there is one available that is useful. The ability to add their own items to the calendar encourages growth in this area, too. The calendar syncs across the platform, so they can see whatever they need on any one of their mobile devices, particularly if they log in using the web browser.”

30

STAFF BENEFITS

Show, Don’t Tell: Teachers Learn, Too

“For staff who went ‘all in’ with our initial rollout, the most significant impact has been the ability to reuse resources.

It’s easy to pull from question banks or improve last year’s final example with a few tweaks. Teachers genuinely feel empowered to improve without constantly reinventing the wheel. All staff have benefited from our most recent Schoology venture—using a Schoology Course to manage professional development. We started this with Schoology-based PD sessions. For 2018-19, we were intentional about getting presenter materials in advance, had pre- and post-assessments, and followed best-practice teaching methodology. Rather than telling staff in a separate PD on how to implement Schoology, we showed them using discussion boards, test/quiz assessment, and media albums. Onboarding modules are built for new teachers to be apprised of our initiatives and everyone has access to the resources.”

JEN SMIELEWSKI

HS History Teacher, Director of Curriculum and Instruction, Oakland Christian School, MI

Years using Schoology: 6

District Enrollment: 600

Hardware Structure: 1:1, Student-owned iPads

31

STUDENT BENEFITS

Never Miss a Beat

“According to the students I have spoken with, the biggest benefit of using Schoology for my students has been the ability to access learning on their own terms.

Students can access learning materials, assignments, notes, media, homework, and anything else deemed necessary for learning at any time, either through the easy access of the Schoology website or through the Schoology mobile app. Students can miss class for a field trip, illness, internship, job shadow, or other extra-curricular activity, then access what they missed through Schoology. Being in a large urban district with occasional transportation issues, absences, and tardiness, Schoology makes it possible for students to stay on track with their schooling while dealing with all of the daily occurrences of life.”

32

STAFF BENEFITS

Collaboration and Coordination

“The biggest benefit for our whole staff having Schoology is that all staff members have access to professional development, curriculum and instruction materials, common assessments, and digital lessons.

It is very easy to distribute materials and information to staff members, and it is easy for staff members to submit materials to administration, such as syllabi, evaluations, and reflections. Teachers can create groups and learning communities and can connect and share materials with one another, in addition to connecting with other educators that use Schoology around the world. In addition to staff, teachers, and administration being on the same page in terms of collaborating with one another, Schoology allows for teachers to create a vast repertoire of lessons, assessments, and materials that they can use, modify, and distribute from year to year.”

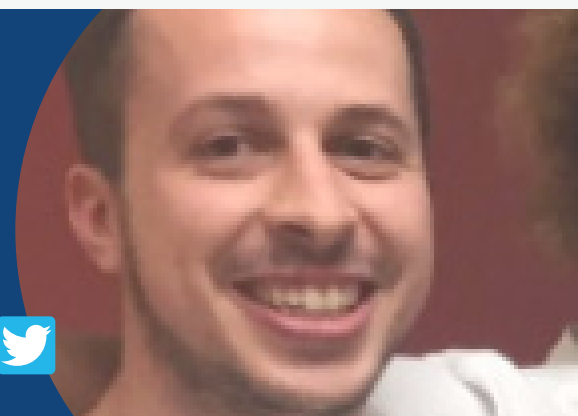

MICHAEL CABRAL

Teacher, Cincinnati Public Schools, OH

Years using Schoology: 6

District Enrollment: 35,000

Hardware Structure: 1:1, students cannot take them home

33

STUDENT BENEFITS

Agency for All

“Do I have to choose 1? Okay, I would have to say access: access to resources, access to feedback, access to calendars, access to their community.

Putting these items in the hands of students places an ownership on them that they might not have previously experienced. It is that ownership, that digital agency, that helps them to take control of their learning. They know when assignments are due and when assessments occur. They can refer back to the feedback provided by instructors. They can revisit resources as needed. They can communicate and collaborate with their classmates from within the platform. Barriers are removed, and students can initiate their own next steps.”

34

STAFF BENEFITS

The Ripple Effect

“Schoology has opened a door for our staff to communicate and collaborate in new and different ways.

They are no longer dependent on someone from the district level answering questions and solving problems. Through Updates they are reaching out to each other as well as others in the Schoology community for answers and ideas. With Groups and AMP Teams, they are collaborating on curriculum and assessment across buildings in ways they haven't before. They do contact their district support, of course, not only for support, but also to provide ideas, solutions, and to celebrate successes. This began with a small group of high-flyers, which is producing a ripple effect through the district, one that is continuing to grow.”

SUSAN MURRAY-CARRICO

Technology Integration Specialist, LMS Project Manager,
Academy District 20, CO

Years using Schoology: 3

District Enrollment: 26,000

Hardware Structure: Sit-based

35

STUDENT BENEFITS

Owning the Learning

“Now that the whole district has access to Schoology, students are better equipped to own their learning.”

Teachers seamlessly integrate resources stored in our curriculum groups into their courses, students interact within the platform, and parents are in the loop as well. Students are able to access materials that were used in the classroom to complete make-up work as well as see applicable options for enrichment in their courses. Students at the elementary level get excited to interact with their classmates when they showcase their work through Media Albums, and middle schoolers are happy to chat with each other through Schoology discussion boards.”

KATE FAULKNER

Intervention and Enrichment Coordinator
Fort Bend ISD, TX

Years using Schoology: 5

District Enrollment: 78,000

Hardware Structure: Shared carts of devices

36

STAFF BENEFITS

Featuring the Features

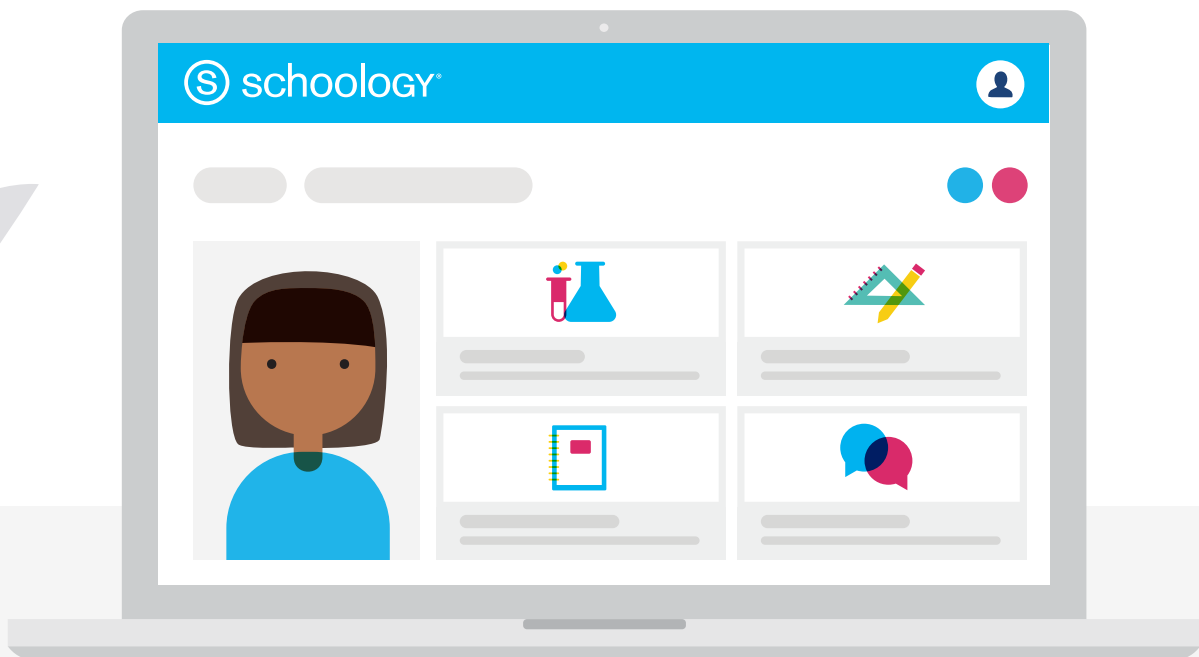

“We use Schoology for professional learning, to house our curriculum resources, and for meeting materials and collaboration within our division.”

Teachers are able to pull resources in our curriculum groups to use with their courses, which integrate so seamlessly with our SIS. Every day we're finding new features that we showcase to the teachers in a professional learning setting. For example, our district is moving to a 2:1 technology ratio, so blended learning is an embedded focus of all of our summer professional learning this year. We are incorporating some of the robust assessment features as well as Microsoft Assignment integration into our sessions to show how easy it is to collect formative assessment data and facilitate collaboration and feedback with students. The other huge benefit has been the collaboration between professionals that we've all witnessed in our curriculum groups. Teachers from across the district are problem-solving and sharing ideas.”

Conclusion

With a district-wide LMS, educators and students can collaborate and communicate in new ways.

Teachers can share curriculum materials, data, insights, and access professional learning resources, while students develop digital agency and take ownership of their learning. A district-wide LMS is essential for delivering personalized instruction, and providing equity and access for every student, no matter where they are.
