

PowerSchool University

Enhance and share your skills at PowerSchool's premier user training conference

Gain Practical Knowledge and Skills

PSU provides hands-on, step-by-step instruction from certified PowerSchool trainers. Work directly within PowerSchool products to use the new skills you learn immediately.

Choose Your Classes

The PSU course catalog includes more than 100 different courses from which to choose. Classes are organized by solution, level of experience, and role, making class selection easy. Additionally, you'll come away with the curriculum for all PSU classes, including those that you were unable to take.

Earn Certifications and CEUs

Certification courses are available at PSU and each attendee's registration fee includes two certification exams. Keep your skills fresh, designate yourself as an authorized trainer on multiple subjects, and learn how to guide other users within your district. PSU classes have also been certified by Lindenwood University, qualifying attendees to earn continuing education units.

Get Answers

PSU staff is available to provide solutions to your unique PowerSchool needs. Meet with SupportLab for one-on-one appointments or attend Open Lab to work with our trainers and customization experts. You're sure to leave PSU with all of your questions answered!

Networking Opportunities

Get to know your PowerSchool community. Build and expand your peer support group and share ideas, experiences, and best practices. You'll have abundant opportunities to network with staff, trainers, and other PowerSchool users throughout the week and on PSU Connect.

Why Attend?

Maximize your efficiency, advance your productivity, and stay up to date on product improvements with hands-on PowerSchool training from certified professionals.

Each course has been specially developed for the participant's role at the school or district. Whether you are a technology expert looking to maximize system ROI, a curriculum specialist focused on improving student outcomes, or an administrator who simply needs to gather information quickly, PowerSchool University has something for you.

Tailored to you! Learn techniques and best practices specific to your role

Every user level and role

Select from a wide variety of courses, taught by certified PowerSchool trainers for every user level from novice to advanced and specific to your role.

Now earn CEUs!

You can earn Continuing Education Units toward your professional development at PSU. Most courses are certified through Lindenwood University to meet CEU requirements.

"The entire experience beginning to end was fantastic. Between the classes and networking with other PowerSchool Admins, I was able to learn more than I could have imagined about the software. The staff were friendly, the instructors were all excellent teachers, and the open labs were marvelous. I can only hope that I can talk my district into sending me again!"
