Technical

KEEP YOUR EDUCATION ECOSYSTEM SAFE
AND SECURE TODAY AND TOMORROW

PowerSchool Services Technical offering helps you **maximize your K-12 education technology investments**: cloud or self-hosting, school and district-wide data, configuration, and more.

Safeguard Your District Against Any Unplanned Event

Rest assured **your school district is protected** against any unplanned event—with daily data backup, full disaster recovery, and assistance when you need it.

Get Infrastructure Updates and Support for Improved Security

Our dedicated security team will **help you stay on top of state reporting** and compliance updates, **reduce IT costs**, and **switch to cloud hosting** to bring you improved security and better peace of mind.

Configure and Tailor to Your Needs

Configure PowerSchool solutions and products to meet your specific school, district, and board needs. With product plugins and customizations, the **software can adapt** to your existing processes for a seamless fit.

“ Moving to cloud hosting all happened **over a weekend** and when we came in on Monday morning, everything was switched over. ”

DEBBI SCHAPP

Student DB Administrator, Torrington Public Schools, CT

Data Operations

Let's get your data to the right place in the right format. We're here to help connect your education ecosystem, whether you need data imported or applications connected.

Experts provide:

- Data conversion and planning
- Database analysis and mapping
- Application interface and integration analysis/development

Product Tailoring

Try ready-to-go plugins for PowerSchool SIS or partner with us to develop customized modules, APIs, or functionality like report cards, enterprise reports, transcripts, and more to meet your goals.

Cloud Hosting

Cloud offers the most secure and stress-free hosting option, with a smooth and easy transition process. Our SIS and ERP cloud-based hosting includes 24/7/365 monitoring and 99.9% uptime and reliability delivered through Microsoft Azure, the largest and most certified cloud infrastructure in the world.

Options include:

- Azure cloud hosting
- Microsoft SharePoint hosting
- Hosted test server
- Hosting VPN connection
- PowerSchool SIS hosting ODS system

Self-Hosting

For self-hosted SIS or ERP customers, our team of technical experts will maintain and monitor your PowerSchool on-premise environment. We'll take care of cybersecurity assessments, compliance updates, SSL certificates, 24/7/365 environment monitoring, nightly backups, long-term storage of data, and infrastructure support.

Additional options include:

- Complete hardware and infrastructure upgrades
- Version upgrade
- Hosting and server migration
- SIS installation
