Services Deployment

SEAMLESS IMPLEMENTATION AND ONBOARDING

Our dedicated team of experts guides you through product implementation to **get your staff quickly up to speed** on PowerSchool—**letting you focus on improving student outcomes.** Gain the right knowledge to get the most out of PowerSchool with **expert-led product training and dedicated project managers** to keep your implementation on track.

Get Started Quickly with Product Onboarding and Support

We work with you to set up an implementation plan, timetable, and desired goals. **You can choose training options** that work best for you and your staff.

Configure to Your Needs

Set up PowerSchool technology based on your needs. **Trust our experts to configure everything** from your report cards and enterprise reporting templates to employee timesheets and personnel budgeting.

Stay on Track with a Dedicated Project Manager

Your project manager will keep your deployment plan on track, help you complete milestones, and collaborate with your school and district staff **whenever you need it**.

Transfer Your Data Seamlessly

Importing your data into PowerSchool is simple! Your project manager will provide data templates, you export your data, and our data specialists will upload them into your PowerSchool product.

Implementation Support

Our team helps set up your PowerSchool solutions and products to meet your needs by tracking milestones, configuring your product(s), and seamlessly importing your data. With the implementation process calendar, keep up with your status at any time.

Dedicated Project Manager

Our experienced project managers are committed to your success. With standardized tools, we help you plan, execute, and track your PowerSchool implementation across all products. Monthly status meetings keep cross-functional teams aligned so your staff goes through implementation in lockstep.

Product-Based Training

With guided product training, your users will quickly get up to speed on PowerSchool solutions and products. Choose between onsite, remote, and on-demand training options that follow our proven methodology, designed to maximize learning retention using practical application, demonstrations, and hands-on practice.

Deployment Packages

Save time with an out-of-the box deployment package that includes product training, project management, customer education, technical support, and data migration. There's no need to figure it out yourself; our experts configure your product and manage project milestones with training and support to ensure your success. Choose from Basic, Standard, Advanced, or Custom packages.

> "The support in switching to PowerSchool was amazing. From the very beginning with the Implementation Project Manager, to the technical support afterwards, made the transition quite smooth. The technical support hours we purchased were extremely beneficial in supporting the work after initial setup. **Project managers were very patient** and understanding of the uniqueness of our small school division. There is so much to learn, and I **don't know what I would have done without this amazing group of people.**"

CHERYL WHITNEY
Executive Assistant
