

Is Your SIS Set Up for Remote Operations Success?

MAKE SURE YOUR K-12 STUDENT INFORMATION SYSTEM IS ALWAYS ACCESSIBLE AND REMOTE READY

Today's school districts must be ready for anything by building systems that **enable remote operations, distance learning, and virtual talent management**. Leading the way at the heart of your connected digital ecosystem, your student information system (SIS) should be accessible anywhere, anytime.

Take this quick assessment to see if your current SIS has you covered on essential features and functions.

Distance Learning

Your SIS should complement your distance learning program by engaging families and facilitating teacher training.

MY SIS:

- Allows parents to extend learning and track progress effectively at home
- Provides web-based student report cards for families
- Offers an online portal where students can get their homework, activities, and enrichment
- Provides remote training for teachers tied into an online professional development solution

BONUS: This online PD solution is:

- Product and role specific
- Allows for completion tracking
- Lets you assign courses out for your staff

Communication

Facilitated by your SIS, collaboration between staff, parents, and students is vital to successful student outcomes, especially during remote learning and operations.

MY SIS:

- Has accurate contact information for each student
- Offers a mobile app for parent and student access
- Is 100% web-based, accessible on any device
- Features online portals enabling easy communication between staff and families
- Provides a survey tool to reach staff, parents, and students to learn about their remote need

Interoperability

When working remotely, productivity relies on your SIS's ability to connect to the other edtech products your district uses.

MY SIS:

Offers quality edtech products that are interoperable with my core SIS including:

- Learning management system
- Online enrollment
- Assessment
- Teacher development

Security

With the need to work remotely, it's more important than ever to bolster your cybersecurity efforts to make sure your systems, data, and privacy are safe.

MY SIS:

- Has a dedicated team of security and compliance experts
- Offers cloud hosting with 24/7/365 monitoring and 99.9% uptime
- Offers cloud hosting with full disaster recovery
- Offers cloud hosting that adheres to the highest security standards, holding certifications such as ISO 27001 and SOC 2

Operational Flexibility

Every school or district is different. Using your SIS remotely should offer configurability to make it work for your unique needs.

MY SIS:

- Allows me to modify grading terms and grade scales easily
- Offers multiple ways attendance can be taken by teachers and admins
- Has a robust master scheduler that lets me meet custom scheduling needs
- Gives me the ability to adjust school calendars and terms with just a few clicks
- Provides free and reduced lunch data and allows parents to request meals through the online portal
- Has comprehensive health information for each student
- Has an online form builder to support custom data collection from staff, parents, and students

How did your SIS score? How many boxes did you check?

27

Congratulations—you've got the perfect SIS for successful remote operations

21-26

You're close but there's room for SIS improvement

15-20

The writing's on the wall—we suggest you start looking at SIS options

14 or less

There's no doubt about it—it's time for a SIS upgrade
