

# Strengthen Security of Student and Staff Data With PowerSchool

21st Century Threats Require a Renewed Focus on Protecting the Data of Students and Staff Throughout Your Organization

PowerSchool, the leading provider of cloud-based software for K-12 education in North America, is committed to protecting your student and staff data—taking prudent and appropriate countermeasures to support data confidentiality, integrity, and availability.

## PowerSchool students, parents, and educators can rest assured knowing:

- PowerSchool has a robust program to protect the security and integrity of our applications - including security by design, third party penetration testing, and a responsible disclosure program.
- PowerSchool has industry-leading investment and security to protect our customer cloud, including intrusion detection and prevention, web application firewalls, advanced endpoint protection, and 24x7x365 eyes-on-glass monitoring by our Security Operations Center.
- PowerSchool's cybersecurity investments are intended to prevent the type of data breaches that have recently been reported by users of other (non-PowerSchool) education companies
- PowerSchool has a robust security incident response process and transparently and rapidly communicates with any customer potentially impacted by an incident.
