

Unified Insights™ Student Learning

Get better visibility to instructional needs by combining your PowerSchool SIS and Schoology Learning data.

PowerSchool Unified Insights™ Student now gives you a more complete view of student performance, including interactions in Schoology Learning. Bring all your district's disparate data together into one convenient view. **Easily track, manage, and monitor student performance trends and instructional gaps** in visually compelling pre-made dashboards and ad hoc reports built with Microsoft Power BI. Gain a comprehensive view of overall student performance to drive data-informed decision-making, especially around district initiatives like PBIS, MTSS/RTI, and restorative practices.

Save time with pre-built dashboards

Provide staff with **pre-built visuals**, from day one, that inform instruction.

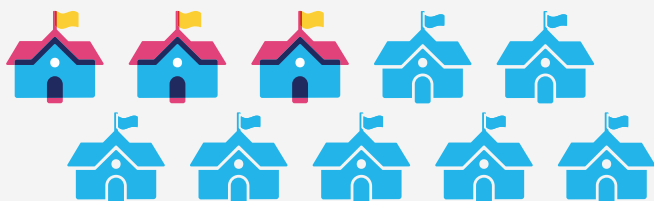

Interoperable with PowerSchool SIS and Schoology Learning

Simplify your IT staff's workload with an analytics solution that integrates directly with your PowerSchool SIS and Schoology Learning, saving time on support, training, and implementation.

Increase understanding of instructional gaps

- **Understand the adoption levels, engagement, and effectiveness** of distance learning initiatives at a district, school, grade, course, and even a student level.
- **Identify any gaps** in equity, access, or distance learning engagement by demographics, socio-economic level, and/or special education status.
- **Identify at risk students** with learning and achievement gaps that have resulted from low engagement and require intervention.

7 out of 10 districts are unable to track the effectiveness of district learning programs to date

Ad hoc report building

In addition to pre-built dashboards, you also have the option to create ad hoc reports and customize how you view your data with Microsoft Power BI.

Strategic filtering

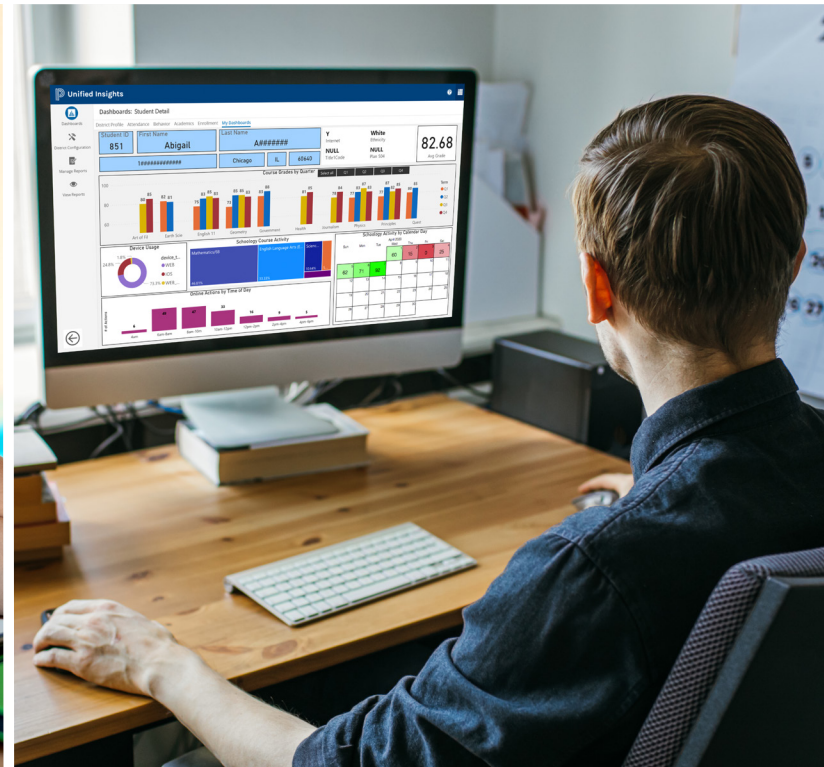

Apply filtering based on a targeted grade, course, teacher, or more. Allow users to drill down and make data-driven decisions regarding specific populations within your organization.

Bookmark Your Favorite Reports

Quickly access shared reports and save them to your "favorites" for quick access.

Better understand distance learning adoption

Learn how to identify your instructional gaps with PowerSchool Unified Insights™ Student Learning.
